PUBLIC INFORMATION SESSION
May 2, 2019 4 p.m. – 7 p.m.
CITY OF NEWARK MUNICIPAL BUILDING
MAIN STREET WATER MAIN REHABILITATION PROJECT

On Thursday May 2, 2019, the City of Newark Public Works and Water Resources Department will be holding a public information session for the water main work associated with the Main Street rehabilitation project. This information session will be held at the Newark Municipal Building Council Chambers located at, 220 S. Main Street from 4:00 p.m. – 7:00 p.m. A brief presentation followed by a question and answer session will be led by City staff at 4:30 p.m. City staff will repeat the presentation at 5:30 p.m. and 6:30 p.m.

The planned water main work involves the installation of new fire hydrants to improve hydrant reliability and hydrant flows. We will also be adding new valves that will allow our crews to isolate segments of the water system to perform future repairs with fewer impacts to customers. This work will temporarily affect your water service.

The Public Works and Water Resources Department prides itself in maintaining our water distribution system to ensure reliability and provide superior quality drinking water to our customers.

Please plan to attend this meeting to better understand what the service disruption and boil water advisory will mean for you. Additional notices will be issued to affected properties prior to service disruptions with specific information on the timing of the outage and boil water advisory information.
